

Bhagyesh Chaudhari

User Experience Designer

Phone: (+91) 900 440 2064 | Email: bhagyeshsc@gmail.com | Address: Andheri (West), Mumbai - India

Elixir of my life

I'm Bhagyesh, my friends call me griffin. It's been my gamer tag, and it is stuck ever since. Clicking photos is my thing, and am pretty good at it too. Given real life situations, I tend to be a good problem solver. I don't compare myself to others. I don't compete, I improve. I've been known to rant about design, astrophysics, anime, general physics. I am waiting for Virtual Reality to take over this world. I love creating stuff, also surprise pizza treats...

My Work Journey

User Experience Designer (*Apr 2017 – Present*)
63 Moons, *Andheri - Mumbai*

Worked upon the Tasks flows, Information Architecture, wireframes, interaction design of a project. Got to collaborate with team members and quickly learn the process. My most cherished contribution was adding motion design and choreographing it. Worked on a chatbot creator, an eCommerce site creation platform creating Empathy maps, Low and High fidelity mockups and prototypes. User Research and Usability Testing were conducted. There are plenty things I learned here, like data security & scalability being the most important out of them.

UI / UX Designer (*Jan 2016 – Mar 2016*)
Raxter.io, *Gandhinagar - Gujarat*

My primary work was to design a new brand identity along with a landing page. Added user engagement into the inner functionality of the site. The site was going from alpha to beta live. My contribution was of adding gamification on the site for increased user interaction and quality content. Reputation system was introduced, Website was redesigned. Got a bit of overview of neural networks and how they work.

UI Designer (*2015 – 2016*)
Squid Technologies, *Fort - Mumbai*

We were working on a B2B application suite which had an employee management to keep a track of the leaves, documents & management. Tasked with providing any assets needed in the development. Creating brochures and social media ads were also a part of my job.

Education

Goa University – Goa College of Engineering

Completed my degree from here. Got an opportunity to get a working experience during this time. Completed my degree in Computer Engineering.

DTE – Government Polytechnic Panaji

Completed my diploma from "Directorate of Technical Education" Goa. Was lucky to get a chance to set up a server and the proxies for entire our college and hostels. Our college didn't have the entire college on one network that time.
